

# Snuggle™ Award-Winning Featherlight, Huggable Pediatric Body Array

Diagnose what you've been missing

## Improve Clinical Images

- Super-flexible 24-channel body contouring coil improves image resolution
- Improved contrast for enhancement in tumours, vessels and cardiac motion
- High coil density maximizes parallel imaging to improve imaging speed

## Improve MR Technologist Workload

- Lightweight flexible design enhances patient cooperation
- Easy to handle and fast setup increases patient throughput
- One multi-purpose coil reduces the need for anatomic specific ones

## Improve Patient Experience

- 80% lighter coil is blanket-like not rigid and restraining
- Faster patient setup reduces MRI scan time
- Superior images decreases the need for additional diagnostic procedures

## Patient Size Matters

80%

Lighter Coil

10-40%

Better Throughput

## Kid Sized. Super Flex.

Flexible array enables a close fit to maximize the signal-to-noise ratio and provide high spatial and temporal resolution

High coil density maximizes parallel imaging capabilities to improve imaging speed

Coil elements are sized for pediatric patients without hard nodules, patients can lie comfortably on the array

### Technical Specifications

Field Strength	3.0 Tesla
Product Weight	Pad 0.8 lbs. (total weight with cable – 3.3 lbs)
Pad Size	15.0 in x 11.4 in
Thickness	0.6 in to 1.3 in
Imaging Area	11.0 in x 11.4 in
Number of Elements	24-Channels (12 in each pad)
Cable Length	55 in
Model Number	PBA24GE30A
Print Design	Space Dinos
MRI System Compatability	

### Case Studies and Diagnostic Images

Visit our website to read about our latest diagnostic imaging advancements and to view our extraordinary MR images

### Improve a MR Technologist Workload

Easy to handle and fast set-up may improve patient cooperation and throughput.
